

**Private Pilot Checklist**

**Name:**

Lessons	Introduced	Practice	Proficient	Checkride proficient	Requirement met
Preflight procedures					
Postflight procedures					
Minimum control airspeed flight					
Taxi and parking					
Straight and level flight					
Climbs					
Descents					
Airspeed control					
Approach to landing stall (full)					
Takeoff Stall (full)					
Imminent stalls					
Accelerated/turning stalls					
Traffic patterns					
Go around/aborted/balked landing					
Aborted takeoff					
Normal Takeoff					
Normal landing					
Emergency landing (simulated)					
Class D operation /communications					
Class C/B Operations					
Flight Following communications					
S Turns					
Turns around a Point					
Steep Turns					
VOR navigation/radar nav					

Pilotage navigation/chart usage					
Flight planning					
Weight and balance					
Weather planning					
Soft Field landing					
Soft field takeoff					
Short Field landing					
Short Field takeoff					
Crosswind takeoff					
Crosswind landing					
Slip to landing					
Unusual attitude (under hood)					
Instrument maneuvers(under hood)					
Dual crosscountry 50NM min					
Dual crosscountry >100nm w/night					
Dual Night 10 takeoff and landings					
Dual 3 hours night total					
Dual 3 hours Cross Country					
Dual 3 hours reference by instrument					
Solo 3 takeoff and landings at operating control towered field					
Solo Cross Country 150Nm, 3 points with landings and one leg more than 50Nm					
Solo 5 hours total					
Lost procedures					
Diversions					
E6B in flight					
Spn awareness					
Emergency procedures/ checklist usage					
System failures					
GPS/IPAD usage (not required)
